

Discussion: Planning Work On Extended Examples

16th Geant4 Collaboration Meeting, 19 - 23 September, SLAC

Extended Examples

- Assigning the existing extended examples to WG members
 - See new text document (`extended_examples_assignments.txt`)
- A wish list
 - New features not yet demonstrated in any example
 - Code snippets that are commonly asked in the user forums.
 - Like the recent question how to "know the parent particle name" of a track
- A deprecated list
 - Examples to be removed or completely re-worked (if they are too complicated)
